Dear Residents Receiving Bottled Water from Eco Pure:

The bottled water being supplied to you by Eco Pure Bottled Water is provided by Kansas Department of Health and Environment (KDHE) Dry Cleaning Remediation Program in response to contamination from the Former Four Seasons Dry Cleaner. Eco Pure is billing KDHE for the water which is provided at no cost to the homeowners. The first delivery will be three 5-gallon bottles of drinking water which Eco Pure estimates will be enough to last two weeks in an average-size household of three persons. Subsequent deliveries will be based on the number of empty bottles being replaced. If your household is larger than average and/or there are other reasons why more water is needed, please contact Rick Avila, KDHE Program Consultant at 785-291-3121. The Dry Cleaning Remediation Program will review each request for more bottles of water and may adjust the number on a case-by-case basis. Specific approval must be granted by KDHE to Eco Pure Water prior to delivery of additional bottles.

For those residents receiving bottled water, Eco Pure will make deliveries every two weeks and replace the number of empty bottle with a like number of full bottles. The day before your next scheduled delivery Eco Pure's representative Kathy Harris will call you. She will advise you they will deliver the next day and ask how many bottles you need. Eco Pure has been instructed to not leave more than the approved bottles without specific approval from KDHE. If you tell Kathy you need to replace two bottles of water, please be sure you set out two empty bottles for pickup. Eco Pure normally delivers water to your front porch. Please tell Kathy if you want your water bottles delivered to a different spot such as your back porch.

Thanks you in advance for your cooperation in making this project successful.

Rick Avila
